✖ Purpose

What problem does your AI solve? Who will it help? Be specific about what makes it special and different from other helpers.

Our AI solves the problem of students getting distracted and confuse while doing homework, especially in subjects like math and reading. It helps elementary and middle-school students who forget assignments, struggle to stay focused, or don't understand directions. Reads homework instructions, creates a schedule, blocks distractions, shows short example problems, keeps track of progress.

🎤 Name & Personality

Give your AI a catchy name! Describe its personality — is it funny, serious, energetic, or calm? What makes it unique?

Name: José María Jabo

Personality: friendly, organized, and encouraging. It stays calm when the student is confused and excited when they finish tasks. It uses small missions and rewards to make homework fun and adjusts to each student's learning style.

🌟 Special Powers

List 3-5 amazing things your AI can do. Think about features that would help, entertain, or teach in creative ways!

1. Explains homework in simple steps with examples.
2. Turns homework into fun missions and rewards progress.
3. Give reminders when students get distracted.

📁 What It Looks Like

Draw or describe your AI! Is it a robot, an app, a hologram, or something completely new?

My AI, José, looks like a small floating hologram with a bright screen face. It changes colors based on the student's mood and projects mini lessons and examples in the air.

Purpose

What problem does your AI solve? Who will it help? Be specific about what makes it special and different from other helpers.

This is an AI planner. It is connected to our app for school (where we get grades), so it knows about your upcoming tests. You can tell him everything that you have to do in a day, and it creates the best possible plan. It organizes students better so that they can be productive. It's an app that also sends you notifications and makes plans that are fun and not boring.

Name & Personality

Give your AI a catchy name! Describe its personality — is it funny, serious, energetic, or calm? What makes it unique?

Future plan

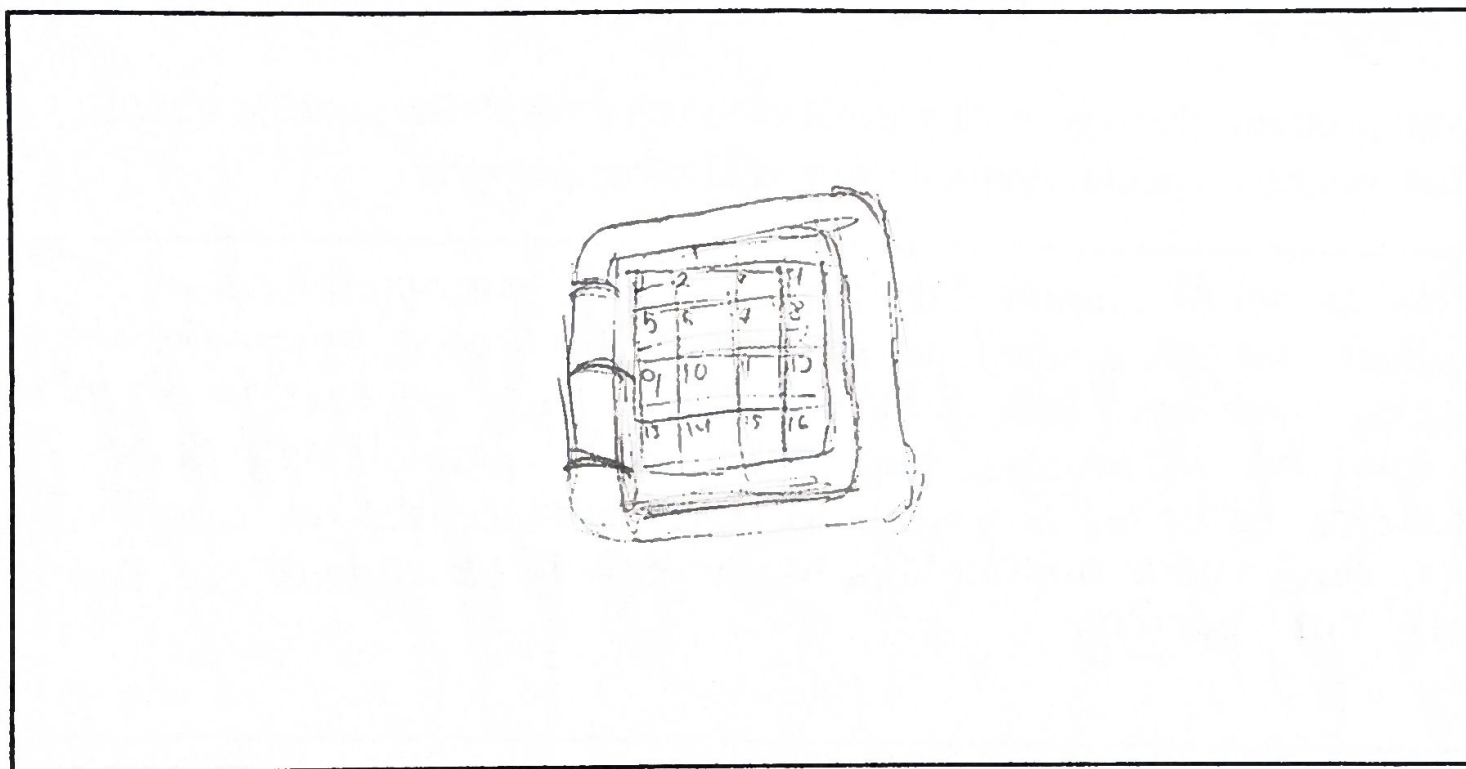

⚙️ Special Powers

List 3-5 amazing things your AI can do. Think about features that would help, entertain, or teach in creative ways!

- makes the best plans that are fun
- after every task you get a little reward (for example you get to play a game like 1 round of tic-tac-toe)
- * - you will learn how to do it yourself for the future
- * - to make sure that you did your task you have to send the picture and he can check it and correct it maybe
